

Project Goal**ACRP Mt Eden Prison****Client**

Fletcher Construction

Location

Mt Eden - Auckland

Project Parameters

Situated within the existing site, the new prison will provide facilities that meet modern standards. The existing Mt Eden Prison and Auckland Central Remand Prison need to stay open throughout the construction period. One of this projects challenges is working through a secure and operating prison site. Due to confined site area and up to three cranes operating at once, significant hazards are regularly managed.

Services Provided

- Topographical Survey
- Building Setout
- Calculation of grid in relation to boundary
- Calculation of building in relation to grid
- Establishment and maintenance of survey control and setting out of grids
- As built plans of wing walls and lift pits
- As built plans of grid setout on concrete slab

Project Period 2008 to current**Project Budget** \$250 million**Works Budget** \$350 k
